User Stories:

Customer can view a list of available groceries so that they can make purchases more easily. When customer add goods to a cart after registering and logging into the app, they can see a calculated total price of the products in the cart.

When Customer click the "Add favorite" option, the item should be added to my "favorite groceries" list so that I can readily access them whenever they need them. When customer visit the favorites tab while logged into the app, they can see a list of my favorite groceries, which we can use to place new orders.

Customers also receive Email Confirmation when they successfully placed an order.

Admin can change the Grocery products, prices, and define whether the order is picked up or delivered.
